DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12 and 33, drawn to a cover gas composition.

Group II, claim(s) 34-51, drawn to a method of protecting molten magnesium.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1 is obvious in view of Dougherty, Jr et al (US 5,115,868) , which discloses a fire extinguishing composition including a fluorine containing gas (col. 2, line 65 to col. 3, line 33) in view of which the claimed cover gas composition is obvious accordingly the special technical features linking the three groups does not provide a contribution over the prior art and no single inventive concept exists. Applicants' remarks of April 12, 2004 have been noted but are not persuasive since the difluoromethane claimed in Claims 7 and 10 does not differ from the difluoromethane disclosed by Dougherty Jr et al (see col.3, line 7).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at

Art Unit: 1742

least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
